

HARIS P P

Senior Software Developer | Qt/C++ & PyQt | Cross-Platform Desktop, Video & AI Solutions

Kannur, Kerala, India | +91 6238 446 920 | harisprp@gmail.com

[Upwork Profile](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Software Developer with 14+ years of experience building desktop, mobile, embedded, and computer-vision applications across Windows, Linux, macOS, Android, and iOS. Specialized in Qt/C++ and Python for high-performance, cross-platform products spanning video streaming (WebRTC/HLS), real-time analytics, and AI/computer-vision systems. Top-rated on Upwork (100% Job Success), owning the full lifecycle from architecture to deployment.

RECENT PROJECTS

- **Screen Recording Application (Windows & macOS)** — Replay Video Capture. Cross-platform desktop screen & video capture app. applan.com/replay-video-capture (C++/Qt)
- **Parental Control Application (Windows)** — Teleteens. Windows app for monitoring and parental control. teleteens.co (C++/Qt)
- **DJ & Audio Broadcasting Software** — MixWorx. DJ mixing and live audio broadcasting platform. distream.music-worx.com/mixworx
- **Network Camera Recorder with Analytics** — HLS live view with audio on Web and desktop client apps, plus object/motion analytics. (C++/Qt)
- **Access Control Application** — Remote door control system across Web and desktop. (Web/Qt/C++)
- **Beacon Management App** — Bluetooth communication and beacon configuration for advertisement systems. (C++/Qt)
- **Trading Application** — Cross-platform desktop trading client. (C++/Qt)

EXPERIENCE

Full-Time Freelancer

2023 – Present

Remote · Top-Rated on Upwork (100% Job Success, 4.8★, 23 jobs, 454+ hours)

- Deliver cross-platform desktop, mobile, embedded, and computer-vision solutions for international clients.
- Build video, audio, and AI-powered applications in Qt/C++ and Python, owning architecture through deployment.

Senior Software Developer — Vappica

Jun 2014 – Dec 2022

Remote · New York, USA

- Spearheaded development of network camera recorder software in Qt with object detection/recognition, motion detection, and email-alert analytics.
- Designed cross-platform client applications for Windows (Qt/QML), Android, iOS, and Web for previewing and analyzing server data.
- Led a WebRTC-based classroom platform with audio/video/text chat, assignments, exams, and student management.
- Built Raspberry Pi camera recorders with detection & alert systems, a WebRTC intercom (Android/iOS clients), and a beacon configuration app for advertisement systems.
- Developed web tooling for access control and remote door operations using Apache, MySQL, and PHP on Ubuntu.

Design Engineer — NiLogic Pvt Ltd

Jun 2011 – May 2014

Pune, India

- Developed computer-vision applications on BeagleBoard for fire/cloud detection during explosions and dimension measurement.
- Cross-compiled the Linux kernel for BeagleBoard platforms.
- Built an Android application to control Raspberry Pi GPIO functions.

TECHNICAL SKILLS

Languages: C/C++, Python, Java, JavaScript, PHP, HTML, Shell Script, Dart

Frameworks & Libraries: Qt/QML, PyQt, OpenCV (ML), TensorFlow, Keras, Flutter, WebRTC, FFmpeg, HLS

Platforms: Windows, Linux, macOS, Android, iOS, Raspberry Pi, BeagleBoard (Embedded)

Domains: Computer Vision, Video Streaming, Real-Time Communication, IoT, Desktop Applications, Web Backend

EDUCATION

M.Sc. Electronics

Cochin University of Science and Technology

B.Sc. Electronics

Kannur University
